

Subcontractor Registration Scheme (SRS)

The Provisional Construction Industry Co-ordination Board (PCICB) introduced the Subcontractor Registration Scheme (previously known as Voluntary Subcontractor Registration Scheme) in November 2003. The objective of the SRS is to build up a pool of capable and responsible subcontractors with specialised skills and strong professional ethics taking part in building and engineering works.

Swire Properties Management Limited (SPML) supports the SRS and has decided to incorporate the SRS as a mandatory qualification for all contractors. It requires all contractors working for SPML to complete the SRS registration, contractor fails to register under the SRS would not be invited for tendering our future works.
